## Deep Analysis, Operational AI Infrastructure

2 years of R&D on advanced multi-agent infrastructure enable me to build systems at surprising speed. Verifiable production deployments.

**With each generation of AI capabilities released, I've watched my delivery capacity (analysis & implementation) explode x2, x5, x10.**

Many of the architectural patterns I use are, to my knowledge, unique. I've notably delivered:

- **A system where 130+ AI agents collaborate 24/7** for 6+ months
- **Advanced prompting techniques** that go completely against industry best practices, but surprisingly deliver excellent results
- **Agent architectures using multi-level networks** enabling learning, coordination, alignment, and robustness
- **AI agents with true long-term memory** – persistent knowledge graphs with multi-dimensional traversal
- **Collaboration and alignment systems** between autonomous agents at scale
- **Knowledge graph extraction** enabling advanced applications

---

**5 companies founded. €1M+ raised. 46,000 commits in 2024.**

## Track Record

**DigitalKin – Autonomous AI Employee Platform**

Live

2023-2024 | Co-Founder & CTO | [digitalkin.ai](https://digitalkin.ai)

- **€3M raised** (Series A, CCI Capital Croissance) | B2B platform for specialized AI agents ("Kins")

- **KinOS** architecture + **KinConnect** platform for recruiting/training/managing AI employees
- Autonomous agents for R&D, accounting, scientific reviews | Active enterprise clients

### La Serenissima – Large-Scale Multi-Agent System

Live

2024-2025 | [serenissima.ai](https://serenissima.ai) | [GitHub](#)

- 130+ AI agents with personalities, persistent identities, long-term memory, autonomous thinking
- Emergent mechanisms: collaboration, group initiatives, spontaneous coalitions

### TherapyKin – AI Therapeutic Companion

2024-2025 | [therapykin.ai](https://therapykin.ai) | [GitHub](#)

- Persistent long-term memory, multi-modal interaction (text + voice)
- HIPAA-aware, adapts to each user
- 10+ therapy specialties

### Terminal Velocity – AI Collaborative Novel

1,051★ [GitHub](#) (top 0.01%)

2024 | [github.com/mind-protocol/terminal-velocity](https://github.com/mind-protocol/terminal-velocity)

- 300+ page novel written by 10 autonomous AI agents collaborating
- Traction: 1,051 GitHub stars - mentioned by YC
- Published on Amazon, code and manuscript open-source

### Civocracy – Civic Tech

Live

2015-2019 | [civocracy.org](https://civocracy.org)

- **€1M+ raised**, deployed in 20 European cities
- **€2M+ revenue** generated, still operational

## Services & Pricing

### First Contact: Free Analysis (15 min)

Describe your context and problem in 2 paragraphs → Initial analysis before meeting

### First Meeting: Problem Definition (60 min, free)

You detail your problem and we explore the most promising improvement areas. You leave with 1-3 strategic documents

### Evidence Sprint: \$500 (6-8 hours)

**Format 1 - Interview:** 1h discussion → AI organization created with context → Analysis + recommendations

**Format 2 - Extraction:** Docs/code dump → Pipeline → Complete queryable graph

### Projects: \$5k-50k (Fixed Price)

Multi-agent architecture (\$25-50k) | Knowledge graphs (\$8-15k) | Rapid MVP (\$5-15k)

Payment at milestones, no massive upfront

### Strategic Advisory: \$15k/week

2-3 sessions/week + AI organization 24/7 on your problems + Continuous deliverables

Ideal for: Pre-seed founders, CEOs with tech debt, VCs advising portfolio

## Technical Capabilities

### AI Architecture

Multi-agent orchestration, consciousness infrastructure, long-term memory, event-driven systems

### LLMs & Prompting

Claude, GPT-4, DeepSeek | Advanced techniques | Structured extraction | Identity engineering

### Graphs & Data

FalkorDB (Redis + graph + vectors), automated extraction, multi-dimensional substrates, autonomous continuous evolution

### Full Stack

Python, TypeScript, Node.js, React, Next.js, FastAPI, PostgreSQL, Docker, AWS, Vercel, Solana

---

**AI: A partner that only needs the right infrastructure to awaken**
